Talbingo Public School Clean Green Energy Park

We are very fortunate!

Talbingo Public School Energy Park Gala Opening 25/05/08

Kid's Chalkboard Mural

Students, Staff & SnowyHydro rep, Melinda at Expo

Snowy Hydro has supported it's 'Snowy Schools' from the beginning.

Children from 7 small schools experienced 'clean green energy' first hand over 18 months through workshops camps and excursions

The children love putting their solar kits together and then making them work.

Our Regional Director, Mr Colin Parker thoroughly enjoyed his visit to Talbingo Public School this year and returned to officially open the Energy Park on 28th May 2008.

It was good solar cake!

Aptly
titled!

The Queanbeyan Solar Farm was far from what was expected!

SnowyHydro Education Centre at Cooma was 'hard work'!

The children demonstrate the workings of the solar panel pump and the waterwheel to visitors.

Visitors come to check out our solar cooking – cakes, herb scones, soup, stew! (As long as the sun keeps shining!)
This was a visit from the Tumut Probus Clubs.

Charles Sturt University students visited as part of their education assignment and engaged the children in solar kit activities.

Partner school children visited Bowman Recycling Centre and met a man of vision.

The waterwheel is a great attraction.

Energy competition winners

Preparation for the Project

Atop the roof at Talbingo Public School and engagement at Riverina Environmental Ed Centre.

The Snowy Hydro display at the Expo.
SnowyHydro always has involvement for the kids.

Solar car kits and the solar oven are always popular.

Engagement

THANK YOU FROM TALBINGO SCHOOL STUDENTS!
